

XM Satellite radio offers me quality I cannot find on FM or AM, it is commercial free and I am able to listen to what I want, not what Clear Channel or some other larger company wants me to hear. I benefit everyday from listening to XM because it is commercial free and a time saver for finding out today's weather, I do not have to wait around for ads and dj's. I pay ten dollars a month for this service, FM and AM are still free the last time I checked, so it is two different products. Do not control what I listen to, I have a right to hear whatever I want when I want, has to do with a little thing called the 1st Amendment.
